

Call for Papers

The MathWorks invites automotive engineers and researchers to submit papers for MathWorks Automotive Conference 2009. This annual conference brings together international automotive experts from leading OEMs and suppliers with MathWorks developers and partners to exchange ideas and share successful implementations of technical computing and Model-Based Design using MATLAB® and Simulink®.

Important Dates

23 January 2009

Authors submit abstracts

20 February 2009

The MathWorks notifies authors of acceptance

20 March 2009

Complete papers due for review

24 April 2009

Reviewed papers returned to authors for update

8 May 2009

Final papers and presentations due

9 June 2009

Conference begins

MathWorks Automotive Conference 2009 Highlights

- > Latest technologies for using Model-Based Design to develop production software
- > Customer presentations and case studies
- > Demonstrations of third-party products adding value to a MATLAB and Simulink based development process
- > Open discussions with senior development managers from The MathWorks
- > Master classes that provide tips and tricks for advanced users

Submission Details

We invite you to present a technical paper that demonstrates how MathWorks products support innovation and improve automotive development processes for embedded systems.

To be considered as a presenter, e-mail your abstract to auto2009@mathworks.com by 23 January 2009 and provide the following information:

- > Title of paper
- > List of authors
- > Abstract (minimum 50 words)
- > Speaker biography

All contributions must be written in English.

For more information, please contact the conference team at auto2009@mathworks.com
